

Subject [Name], what will 2026 bring for your organisation? Mantel experts weigh in with their predictions

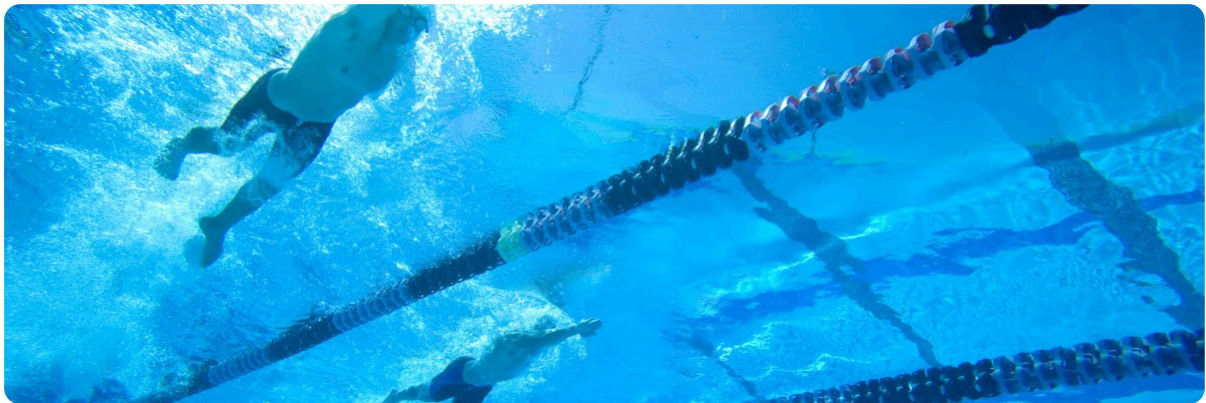

Mantel Insider

Hi there,

And... we're back. Just like that, another festive season passes, and we're fully into the swing of things. As the world looks forward to what 2026 will bring, we're starting off the year by sharing some predictions that our team have made, looking at some cutting-edge technology preparing Australian swimmers for the 2028 Olympics, and showcasing how we're helping you level up your AI game.

As always, happy reading.

— DEEP DIVE

AI powers Australian swimmers' gold charge

In elite sport, success is often decided by the smallest margins; a fraction quicker, a touch sharper, or a decision faster can make all the difference between winning and losing. It's in this context that Swimming Australia turned to Mantel to help establish a sophisticated analytics platform for daily training, harnessing the power of computer vision and AI and propelling our Australian swimmers towards success in pools across the world.
